

# DEDICATED INTERNET BANDWIDTH SERVICES

We are one of the leading internet service provider, with Point of Presence (POP) in multiple locations. DIL, with its state-of-the-art infrastructure, multiple backbones and technologically advanced team, is capable of delivering services with a quality standard not less than any international standards. Our Leased Lines give you one of the fastest, ever-present, most reliable Point-to-Point connections to ensure the constant reliability and quality of your communications. DIL Leased lines are an excellent choice for businesses that need an "Always-on-connection." Leased Access allows users to connect to Internet through static IP, an essential need in VPN connectivity, ERP access, Client-Server applications, extranet establishment. Further, having a leased internet access gives the client an option to host their own web applications. Last but not the least, the pre-known static cost helps customer in budgeting.

## Service Highlights

- Internet access ports capacity ranging from 64 Kbps, through multiples of E1s till multiples of STMs.
- Multiple last mile options through strategically aligned partnership with the last mile service providers.
- Rajasthan's first Wireless based Last mile solution for faster deployment
