### SOME OF THE UNIQUE FEATURES

**Rights Management:** While user is sending an email to any of his colleague in the organization, he can define the rights whether, recipient can Delete/Fwd/Reply or print this email or not. Off course from the sent email, sender may reset those rights at later stage.

**Recall Mail:** If you just realized that you sent an email without attachment or to a wrong person in the organization or missed some content to write into that email. Just relax, now you can recall this message back. This features works on the email sent to the users on the same server (multiple domains supported), and emails may be recalled till the recipient has not read it. Just go to Sent folder, open the email u want to recall, and click on Recall Mail option.

- Keeps record of interaction for every message
- List of New Mails, Read Mails, Yesterdays mail, Today's mails, Replied mails, Forwarded mails, High Priority mails, mails which have Attachments, Reply Awaited mails.
- Share folders with any other user across the domain on the server.

### ADVANCE WEB MAIL

XgenPlus webmail is truly high-tech peace of the entire software. It's features are unparallel to any competition and offer great deal of productivity enhancing, time saving features along with easy admin control for the organization. Entire webmail is customizable to the organization needs and may offer very organization centric services to the organization email users.

### MOST SECURE

(SMIME/PGP, SSL, TLS, CRAM MD5) XgenPlus web mail offers the entire PGP key pair management through web and needs no software to be downloaded on the client PC. All public key becomes automatically available to all internal users. (organization domain)
